About the NHLBI Innovation Conference

The NHLBI Innovation Conference connects innovators developing products to prevent, diagnose, and treat heart, lung, blood, and sleep diseases and disorders with potential investors and partners. Attendees include venture capital firms, angel investors, pharma and medical device companies, business leaders, entrepreneurs, and NHLBI-funded researchers and companies.

A select group of NHLBI SBIR/STTR awardees will have the opportunity to present their programs. The conference will also feature discussions on biomedical product and business development; NHLBI and NIH funding programs, advisory services, and resources designed to accelerate product development; and opportunities to network.
