*“We are noticing a significant increase in the level of participation from the money that was sitting on the sideline for the longest time. Part of it we attributed to the variability and the growth of the local Michigan economy and no small part to the backroom support we have created to accommodate our members and facilitate their participation. We are delighted to see the early-stage space growing and we need more people that are willing to be a part of this “Movement” to put Michigan on the map - **David Weaver - Chief Investment Officer / CitySide Ventures.***

We expect 2021 to be an even stronger funding year for our Birmingham Angels members with the group growing in size every month, and many new exciting companies coming out of the Michigan startup ecosystem.

City Side Ventures is a driven venture group comprised of experienced business builders, die-hard serial entrepreneurs, disrupters, innovators, and technologists.

We are more than just traditional investors; we are a different investment management firm that creates and manages high-risk venture investment funds.
